A.L.P.

A.L.P. is a leading global supplier of lighting components, offering a diverse line of products for lighting OEMs and the aftermarket. From LED to legacy applications, A.L.P. offers the industry's most comprehensive line of injection molded optics, vapor-proof enclosures, unwired fixture bodies, and reflectors. A.L.P. Brands include Steel Craft, LexaLite®, and Reflek®.

A.L.P. LexaLite® is recognized in the lighting industry as a premier manufacturer of optical component solutions for fixture OEMs. A.L.P. LexaLite offers both proprietary and custom injection molding specializing in optical acrylic, polycarbonate and silicone materials. Press sizes ranging from 88 - 1650 tons accommodate a wide variety of part sizes. A.L.P. LexaLite is the leader in edgelit technology, metallizing, UV coating, painting, and photometric testing.

A.L.P. Reflek® is the industry's premium brand of made-to-order formed and fabricated components for multiple applications, including recessed, highbay and roadway. A.L.P. Reflek products include high-performance reflectors, trim rings and housing in a wide variety of finishes.

Steel Craft

an A.L.P. BRAND

For over 40 years Steel Craft has provided customers with outstanding quality and value in metal components. The A.L.P. Steel Craft brand promise is fast and cost-effective delivery of component kits for a wide variety of applications in lighting and other market segments.

Bridgelux has been a leading developer and manufacturer of lighting technologies and solutions for over 15 years, inviting companies, industries and people to experience the power, possibility and financial potential of LED lighting. Born of world-class engineering and informed by human intuition, the company's products and solutions make it possible for its customers to provide high performance, human-centric influenced light for the commercial, residential, industrial and outdoor markets.

Genesis Plastics Technologies is a custom thermoformer of lighting reflectors. Using proprietary high-performance materials and superior tooling technologies, Genesis can mold highly reflective, lightweight, one-piece reflectors that outperform traditional methods and materials. The inexpensive, drop-in reflectors dramatically reduce fixture assembly time and boast reflectivity of 90-97%.

INVENTRONICS

DRIVING THE LIGHTING REVOLUTION

Inventronics is an innovative designer and manufacturer of LED drivers. Driven by an ongoing commitment to innovation and fueled by an array of patented technologies, Inventronics has demonstrated a track record of performance, service and quality. Its broad and growing product line includes constant voltage, constant current and multi-channel drivers from 25W to 300W. These versatile, high-performance solutions are well suited to indoor, outdoor and industrial applications ranging from LED panel lights to high bay and street and area lighting. All products are UL recognized and comply with worldwide safety and EMC requirements.

Quality Assured

LTL (Leading Testing Laboratories) is a NVLAP accredited provider of testing and certification services to support the compliance, quality and standardization requirements of lighting fixture manufacturers. LTL is equipped with state-of-the art facilities to manage all Certifications, Accreditations and Regulatory Approvals. Certification services include UL, Energy Star and DLC. Testing services include photometric testing, reliability and safety testing, electrical and thermal testing. LTL can issue test reports on lumen maintenance, optical efficiency, thermal imaging analysis, as well as LM-79, LM-82 and TM-21.

PACIFIC TECHNICAL SOLUTIONS **Pacific Technical Solutions** is a systems integrator specializing in solutions for Autonomous Lighting and IoT. Our products and services enable fixtures to react to their environment, integrate with building management systems, and act as the intelligent nodes for IoT applications while at the same time, providing a comfortable and healthy environment for their users. Our solutions are end-to-end implementations that span from intelligence hardware inside the fixtures, to cloud-based applications, to value-added apps on smartphones.

reflector guards, etc. Liteguards are used in industrial and commercial locations where fluorescent light fixtures are subject to forceful contact. Construction is of tempered steel wire, resistance welded in a rectangular or square pattern. They are finished in powder coated epoxy and polyester, chrome or white. Coating is moisture and weather resistant. Custom colors and finishes also are available.

Since 1950, **Wiremaid Products** has been the leading manufacturer of fabricated wire guards for industrial fluorescent fixtures, fans and equipment. Wiremaid's line of Liteguards™ efficiently protects emergency lights, exit lights, clocks, controls, fluorescent strips,
